SUMMARY

B.Tech Information Technology student with hands-on experience building full-stack and AI-driven applications through academic and independent projects. Applied machine learning and deep learning techniques to real-world problems with a focus on scalable, clean software design. Selected as a Google Student Ambassador, where he conducted hands-on Google Gemini workshops and led AI-focused initiatives on campus.

EDUCATION

Sri Ramakrishna Engineering College, Coimbatore

B.Tech Information Technology | CGPA: 8.53 / 10 (up to V Semester) | Expected 2027

Cyber Security Specialization Programme

L&T EduTech in collaboration with SREC | CGPA: 9.0 / 10 | Ongoing | Expected Dec'26

St. Xavier's Higher Secondary School, Tirunelveli

Higher Secondary (HSC) | 87.5 % | 2023

Secondary School (SSLC) | 2021

HACKTHONS

Hackathon Participant

Byte Quest Hackathon 2026 | 24 - Hour Hackathon

FactGuard - AI Hallucination & Citation Verification System

- Developed FactGuard, an AI-based system to detect hallucinations and factual inconsistencies in LLM-generated responses.
- Designed a trust-scoring mechanism to provide explainable reliability metrics for AI outputs.

SREC Innovate 2025 (CoIN)

- Participated in institutional-level innovation hackathon focused on problem-solving and technical ideation.
- Collaborated with peers to design and present technology-driven solutions under time constraints.

SKILLS

Programming: Python, Java, C, C++

Web Development: HTML, CSS, JavaScript, React.js, Node.js, PHP

AI / ML: TensorFlow, Keras, Scikit-learn, NumPy, Pandas

Databases: MySQL, MongoDB

PROJECTS

Student Leave Intimation System

Jun'24 - Feb'25

- Designed and implemented a role-based web system to automate student leave and on-duty request workflows.
- Built approval flows for faculty and administrators to reduce manual coordination and errors.
- Implemented using HTML, CSS, JavaScript, PHP, Node.js, and MySQL.

Deep Learning - Based Breast Cancer Detection System

Aug'25

- Designed a deep learning–based medical image classification system using CNN architectures.
- Applied and compared VGG16 and ResNet models to classify benign and malignant cases.
- Evaluated performance using accuracy, precision, recall, F1-score, and ROC-AUC metrics.

AI Scent Designer - Generative Fragrance Modeling System

Jun'25 - Present

- Developed an AI-driven platform to generate personalized fragrance recommendations.
- Applied NLP and sentiment analysis to capture user preferences and emotional cues.
- Built using React.js, Node.js, Python, and MongoDB for scalable personalization.

CERTIFICATIONS

- Oracle Cloud Infrastructure 2025 Certified AI Foundations Associate | Oracle | 2025
- Introduction to Industry 4.0 and Industrial Internet of Things (**Elite + Silver**) | NPTEL | 2025
- Artificial Intelligence in Medicine | GIAN | 2025
- Bootcamp on Robotic Process Automation | NIELIT | 2025
- Introduction to Software Engineering | IBM | 2025
- Database and SQL | Infosys Springboard | 2025
- Java Programming | Infosys Springboard | 2024

EXPERIENCE

eThoughtz Technology | Web Development Intern

Jun'25 & Dec'25

- Worked on a real-time company project to develop a faculty web page for a college website.
- Implemented responsive UI and backend integration using HTML, CSS, Bootstrap, and database connectivity.

Google Student Ambassador

Sep'25 - Present

- Selected as a Google Student Ambassador, leading AI-focused initiatives on campus.
- Conducted hands-on workshops on Google Gemini, guiding students in practical use of emerging AI tools.
